Laboratory Tested Range

TEST NAME

WLTP Combined Cycle

TESTED RANGE

309 miles

Lab based figures are rarely achieved in the real world but can be used to fairly compare vehicles across the market

EXECUTED BY

Grange Lamborghini Tunbridge

TEST COMPLETED AT

04.08.2026, 10:01

MAKE/ MODEL

Porsche Taycan

MODEL VARIANT

4S Plus Sport Turismo

YEAR OF MANUFACTURE

2022

VEHICLE TYPE

BEV

ODOMETER READING (MILES)

21,654

VIN (LAST 4 DIGITS)

9222

ORIGINAL BATTERY KWH (TOTAL)

93.4

ORIGINAL BATTERY KWH (USABLE)

83.7

Real Range Estimates (Miles)

Low		Typical		High	
203 - 220		254 - 275		279 - 302	
URBAN	0%	URBAN	70%	URBAN	100%
MOTORWAY	100%	MOTORWAY	30%	MOTORWAY	0%
WINTER		AUTUMN	SPRING	SUMMER	

2 Range estimates for 3 sets of driving conditions reflecting real world performance. These values may differ from official manufacturer data.

POWERED BY

1/3

Predicted Range Performance (Miles)

3 Predicted range performance for this vehicle based on aggregated degradation data. WLTP tests are carried out in perfect lab conditions and do not accurately reflect real world performance.

Battery Warranty

WITHIN THRESHOLD

The original battery warranty for this vehicle lasts 8 years or 100,000 miles, whichever comes first. Other criteria may apply.

Remaining Warranty Mileage

78,346 MILES LEFT

Remaining Warranty Time

3 YEARS 11 MONTHS LEFT

4 The battery warranty has not expired on this vehicle.

Charging Compatibility

AC Charging
TYPE 2

Public UK AC
chargers

90,172 SLOW/FAST

DC Charging
CCS

Public UK DC
chargers

24,150 FASTEST

DC charging relates to rapid charging at locations such as motorway services and petrol stations. To view all public chargers in the UK, head to zapmap.com.

Charging Port Location

This vehicle is equipped with charging ports located at the front left side and the front right side.

Charging Figures (10–80% Charge)

TYPE	TYPICAL LOCATION		TIME TO CHARGE	AVERAGE COST
Slow	Home (7.4kW)	☾	8 h 42 min	£6
		☀	8 h 42 min	£14
Fast	Supermarket		5 h 51 min	£32
Fastest	Motorway		14 min	£46

- Data reflects the **average** time and cost to charge the vehicle from 10% to 80% at the time of print.
- Charging above 80% should be reserved for longer trips to preserve battery condition.
- Energy night tariffs can provide substantial savings when charging at home overnight.
- This vehicle's maximum DC charging rate is 268 kW.

Further Vehicle Data

Air Quality

CAZ ULEZ

This vehicle can enter Ultra Low Emission Zones (ULEZ) and Clean Air Zones (CAZ) free-of-charge.

London Congestion Charge

£15/DAY

This EV will need to pay the £15 daily Congestion Charge when travelling into London during certain hours.

Vehicle Classification

ULEV/ZEV

This vehicle is classed as an Ultra Low Emissions Vehicle (ULEV) and a Zero Emission Vehicle (ZEV).

Road Tax / Vehicle Excise Duty (VED)

£200/YR

This vehicle will incur road tax of £200 annually.

Original Vehicle Warranty

WARRANTY EXPIRED

The original **vehicle** warranty is 3 years.
This warranty has now expired due to the age of the vehicle.

OTA Software Updates

SUPPORTED

This vehicle is still eligible to receive over-the-air (OTA) software updates.

1 ClearWatt Battery Scorecard

An electric car's battery is complex, and a single percentage rarely tells the whole story - two cars showing the same number can be in quite different health. That's why we don't rely on one figure. The ClearWatt Battery Scorecard weighs up a range of evidence - from readings taken directly from your vehicle, such as cell voltages and charging history, to wider checks like software version and recall status - to build one clear, consistent assessment of battery condition.

2 Real Range Insights

ClearWatt provides range data for vehicles under 3 different driving scenarios. These scenarios reflect the most common, the lowest, and the highest range figures you can expect from this car. These figures are **estimates** and subject to variability. Factors like the vehicle's driving mode, climate control settings, and the driver's driving style will affect the range achieved on full charge. The lab-based WLTP combined range for this car is **309 miles**.

3 Predicted Range Performance

ClearWatt aggregates data from multiple sources, including our data lake of test results to plot predicted range performance. These figures are estimates and will depend upon the specific usage and future treatment of the vehicle. Frequent rapid charging of electric vehicles will accelerate battery degradation and should be avoided where possible.

4 Battery Warranty vs Vehicle Warranty

- EVs typically come with two separate warranties, one for the vehicle and one for the battery inside the vehicle.
- Vehicle warranties typically cover any faults with the motor, drivetrain, electronics and control systems of the car.
- The battery warranty provides protection against accelerated battery degradation and battery faults. The battery warranty covers the performance of the battery, ensuring the performance does not drop below the manufacturer's stated threshold. Speak to your EV retailer to find out more information about the current status of the battery warranty on this vehicle.
- This report provides the status of the vehicle in the context of the original stated manufacturer's battery and vehicle warranty. Additional criteria or information may be requested or required from the manufacturer in order to validate a claim.

This certificate is an assessment based on data obtained from the vehicle's on-board systems and other industry sources. It is not issued, endorsed, or verified by the vehicle manufacturer. The results represent the battery's condition at the time of testing and do not guarantee future performance, reliability, or lifespan. Any modifications or subsequent changes to the vehicle or its systems may render this certificate invalid.
